PROFESSIONAL SUMMARY

Frontend Engineer with **5 years** of experience building responsive, accessible web applications with **React.js**, **TypeScript**, and **Next.js** across enterprise, airline, and AI-driven platforms. Contributed to an **18% booking conversion lift**, reached **90+ Lighthouse** scores, and cut duplicate API calls by **35%**. Experienced in **design systems**, **CI/CD (GitHub Actions, SonarQube)**, **Docker** and **Agile/Scrum** cross-functional teams.

TECHNICAL SKILLS

Core: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass/SCSS, REST APIs, Responsive Design, Cross-Browser Compatibility

Architecture: Component-Driven Development, Design Systems, Storybook, Figma, Server-Side Rendering

Styling: Tailwind CSS, ShadCN UI, Material UI, Styled Components

State & Data: TanStack Query, Redux, Context API, React Hook Form, Zod

Performance & Accessibility: Core Web Vitals (LCP, CLS, INP), Lighthouse, Code Splitting, Lazy Loading, Memoization, Web Accessibility (WCAG), ARIA, Screen Reader Testing (NVDA, VoiceOver)

Testing: Jest, React Testing Library (RTL), Unit Testing

DevOps: GitHub Actions, CI/CD, Docker, Vite, Webpack, Rollup, Git

AI-Assisted Engineering: GitHub Copilot, Claude, Prompt Engineering for Code Generation

WORK EXPERIENCE

Publicis Sapient

Senior Experience Engineer | September 2025 - Present

- Built a **Next.js** personalization **A/B experimentation** component within an 8-engineer experimentation pod, contributing to an **18% booking conversion lift** for **P&O Cruises** and **Cunard**.
- Integrated **Adobe Target** feature flags with **AEM**, enabling **10+ controlled, environment-specific rollouts** across Booking, CDP, and Shorex modules with zero production incidents.
- Maintained **85%+ test coverage** across micro-frontend modules to pass **SonarQube** quality gates in **GitHub Actions CI/CD**, keeping builds clean.

Morgan Stanley - Fixed-Term Contract (via Russell Tobin)

Senior Application Development Engineer | May 2025 - September 2025

- Sole frontend engineer on a **Tech Events platform** built from scratch with **React** and **TypeScript**; owned architecture, component design, and end-to-end delivery for **100+ concurrent events**, working directly with a senior business stakeholder on scope and timeline.
- Adopted ShadCN UI per Global Tech team guidelines, building the platform's component library to align with the organization's design system used across all Global Tech projects.
- Used **TanStack Query** for background fetching and response caching, eliminating redundant API calls for previously fetched data and **cutting duplicate REST API calls by 35%**.
- Accelerated UI component delivery from **4-5 to 10-12 per sprint (~2.5x)** by using **GitHub Copilot** for scaffolding, unit-test generation, and accessibility fixes, while keeping tests and accessibility checks on every component.
- Raised Lighthouse score from **63 to 90+ (LCP from 4.3s to 1.9s)** via **code splitting**, **lazy loading**, and **image optimization**.
- Secured **20+ multi-step forms** with RBAC, protected routes, and **Zod**-validated **React Hook Form** components.

Unisys India Private Limited

Application Development Engineer | June 2023 - April 2025

- Engineered real-time airline retailing workflows for the **Iberia Airline Order View RS** platform using **React**, **TypeScript**, **Redux** for state management, **Material UI** and **REST APIs**, with supporting **Node.js** services, compliant with **IATA NDC v21.3.4**.
- Scaled the **Digital Engineer AI chat** platform to **1,000 daily messages** using **Next.js** and **Vercel AI SDK**, with LLM-based APIs, Microsoft Entra ID SSO and Docker containerization.

- Built the **Unisys Component Library** (Unisys Design System), a **75+ component React library** implemented from Figma specs using Material UI, Styled Components and Context API, with each component individually tested and documented.
- Bundled the library with Rollup and published it as versioned **NPM packages**, adopted by 3 teams (Iberia, Cargo and UFSS).
- Mentored **3 junior engineers** on React architecture, reusable component design, improving PR quality and speeding up review turnaround.

Harlalka Services India Private Limited (Client: VMware)

Frontend Developer | October 2021 - June 2023

- Built responsive, cross-browser UI components for **VMware CSP Marketplace** Publisher and EULA modules using React.js, HTML5, CSS3 and Sass, including form validation with real-time error handling for the cloud solution creation flow, and resolved bugs to improve module reliability.
- Documented **25 reusable UI patterns** in Storybook for the VMware **Clarity Design System**, accelerating feature development across teams.
- Migrated EULA module from class-based to functional components with **React Hooks**, aligning it with the rest of the codebase.
- Raised **web accessibility (WCAG 2.0)** compliance from **50% to 80%** by resolving 100+ accessibility issues, using **semantic HTML**, **ARIA**, and screen reader testing (**NVDA**, **VoiceOver**).

PROJECTS

Prompt Stack | prompt-stack-ai.vercel.app

- Full-stack **AI Prompt Management platform** built with **Next.js 16 (SSR)**, **React 19**, **TypeScript** and **MongoDB**, featuring 30 reusable prompt templates and 11 API endpoints, with an interactive AI Playground integrating **Gemini** and **Groq APIs** for real-time prompt execution.

Incident Management System | github.com/sanju1098/incident-management-system

- Backend REST API (**Node.js**, **Express**, and **MongoDB**) with JWT access/refresh auth, **4-tier RBAC** (Admin, Manager, Developer, Viewer), and **15+ endpoints** secured with Helmet, rate limiting, and CORS.

EDUCATION

T John Institute of Technology, Bengaluru, Karnataka

Bachelor of Engineering - Computer Science | 2016 - 2020
