PROFESSIONAL SUMMARY

Frontend Engineer with 5+ years of experience building scalable, performant, and accessible web applications using **React.js, Next.js, and TypeScript** across enterprise and customer-facing products. Skilled in **reusable UI architecture, design systems, performance optimization, accessibility, and product experimentation**. Experienced in developing **LLM-powered conversational** applications with streaming responses, API integrations, and authentication.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design, REST APIs
State Management & Forms: Redux, Redux Toolkit, TanStack Query, Context API, React Hook Form, Zod
UI Engineering: Design Systems, Reusable Components, Storybook, Material UI, ShadCN UI, Styled Components, Tailwind CSS
Performance & Accessibility: Core Web Vitals, Lighthouse, Code Splitting, Lazy Loading, WCAG, ARIA, NVDA, VoiceOver
Testing & Code Quality: Jest, React Testing Library, SonarQube, ESLint, Prettier
CI/CD & Build Tools: GitHub Actions, CI/CD, Docker, Vite, Rollup
AI Application Development: Vercel AI SDK, LLM API Integration, Streaming Responses
Tools & Platforms: AEM, Adobe Target, Figma, GitHub Copilot, Claude

WORK EXPERIENCE

Publicis Sapient
Senior Experience Engineer | September 2025 - Present

- Increased booking conversion by 27% for **P&O Cruises** and 18% for **Cunard** by implementing the winning Cruise Detail Page personalization variant using **Next.js** and A/B experimentation.
- Enabled **10+ controlled feature releases with zero production incidents** by integrating AEM feature flags, brand- and locale-specific configurations, and Adobe Target.
- Maintained **85%+ frontend test coverage** by implementing Jest tests and enforcing SonarQube quality gates through **GitHub Actions CI/CD**.

Morgan Stanley - Fixed-Term Contract via **Russell Tobin**
Senior Application Development Engineer | May 2025 - September 2025

- Improved **Lighthouse** performance scores from **63 to 90+** and reduced **Largest Contentful Paint (LCP)** from **4.3s to 1.9s** through code splitting, lazy loading, image optimization, and TanStack Query caching.
- Increased delivery from **4-5** to **10-12** tested, accessible components per sprint (~**2.5**x), by standardizing reusable **ShadCN UI** components and streamlining development workflows with **GitHub Copilot**.
- Developed an internal **Tech Events** platform supporting 100+ company-organized events by implementing employee registration workflows and admin features for event creation and management using **React**, **TypeScript**, and **ShadCN UI** components aligned with the Global Tech design system.
- Implemented **20+ validated multi-step forms** using **React Hook Form** and **Zod**, with role-based access control (RBAC) and protected routes.
- Documented frontend architecture and implementation decisions to support consistent development and maintainability.

Unisys India Private Limited
Application Development Engineer | June 2023 - April 2025

- Built a **75+ component React design system** adopted by three teams (Iberia, Cargo, and UFSS) using **Material UI**, **Styled Components**, and **Context API** to promote reusable UI development.
- Reduced page load time by **25%** on the **Iberia Airline Order View RS** platform through route-based lazy loading and code splitting using **React**, **TypeScript**, **Redux**, **Material UI**, and **REST APIs**.
- Built streaming conversational interfaces for the **Digital Engineer AI** platform, supporting **1,000+ daily messages** through **Next.js, Vercel AI SDK**, **LLM APIs**, and **TanStack Query**, with Microsoft Entra ID SSO and **Docker**-based deployments.

- Created a demonstration application for **Unisys Design System** showcasing component usage, customization options, responsive behavior, and theme configuration to help developers explore and integrate reusable UI components.
- Improved code quality and consistency by **mentoring three junior engineers** on React architecture and reusable component design.

Harlalka Services India Private Limited (Client: **VMware**)
Frontend Developer | October 2021 - June 2023

- Improved **WCAG 2.0 accessibility** compliance from **50% to 80%** by resolving **100+ accessibility issues** using **semantic HTML**, **ARIA attributes**, and screen reader testing with **NVDA** and **VoiceOver**.
- Improved the reliability of VMware solution creation and subscription workflows by implementing form validation, error handling, and form factor validations in React components.
- Built responsive, cross-browser UI components for **VMware CSP Marketplace** Publisher and EULA modules using **React.js**, **HTML5**, **CSS3**, and **Sass**.
- Improved maintainability by migrating the **EULA module** from class-based components to functional components with **React Hooks**, aligning the implementation with established coding standards.

PROJECTS

AstraMind - RAG PDF Chatbot | github.com/sanju1098/astramind-rag-chatbot

- Built a full-stack PDF question-answering application using Next.js, React, TypeScript, LangChain, Gemini, and Neon PostgreSQL with pgvector.
- Implemented document chunking, 1536-dimensional embeddings, HNSW cosine similarity search, and top five chunk retrieval to generate context-grounded, streamed responses.

EDUCATION

T John Institute of Technology, Bengaluru, Karnataka
Bachelor of Engineering in Computer Science | 2016 - 2020
